Introduction

This headline provides a summary of the latest key statistics relating to the Welsh labour market, and includes experimental statistics from HMRC's Pay As You Earn Real Time Information and data from the Labour Force Survey (LFS).

Monthly paid employees and earnings from Pay As You Earn Real Time Information

The Office for National Statistics (ONS) and HM Revenue & Customs (HMRC) publish data for Wales on payrolled employees, mean pay, aggregate pay and single month estimates for median pay.

This document was downloaded from GOV.WALES and may not be the latest version.

Paid Employees

Figure 1: Payrolled Employees, Wales, July 2019 to July 2024

Description of Figure 1: A line chart showing the trend in the number of paid employees over the past few years has been generally increasing despite a steep decrease between March 2020 and July 2020.

Source: Welsh Government analysis of Pay As You Earn Real Time Information, Office for National Statistics and HMRC

Early estimates for July 2024 indicate that the number of paid employees in Wales has increased by 900 (0.1%) over the month to 1.32 million.

At a UK level, early estimates for July 2024 showed a monthly increase of 24,200 (0.1%).

by age and by sector are published by the ONS.

Headline labour market indicators from the Labour Force survey, 3 months to June 2024

Confidence intervals for headline labour market rates are available on the ONS website. The latest data shows there were no statistically significant changes for headline labour market indicators in the three months to June 2024. This suggests that the quarterly and annual changes for these indicators are unlikely to reflect a real change in the data.

Employment rate

Figure 2: Employment rate, 3 months to June 2014 to the 3 months to June 2024

Description of Figure 2: Line chart showing the employment rate in the UK has generally been higher than in Wales over the last 10 years.

generally decreased in the UK over the last 10 years but has seen an overall increase since early 2020. In Wales, the rate has fluctuated over this time but generally remains above the UK rate.

Source: Welsh Government analysis of Labour Force Survey

Wales

The economic inactivity rate in Wales was 28.3%. This is up 0.4 percentage points on the quarter and up 3.7 percentage points on the year.

UK

The UK economic inactivity rate was 22.2%. This is unchanged on the quarter and up 0.7 percentage points on the year.

Further information

The ONS have highlighted that the challenges with maintaining response rates for the LFS continue to affect data quality despite the **reweighting of the estimates in February 2024**. LFS-based labour market statistics will be labelled as **official statistics in development (Office for Statistics Regulation)** until further review and we continue to recommend caution when interpreting this data.

We would recommend using the LFS data alongside the trends in other measures of the labour market, particularly Workforce Jobs (a quarterly measure of jobs), claimant count (the number of people claiming unemployment related benefits) and the RTI data from HMRC (the number of employees on payroll) to gain a clearer picture of the Welsh labour market.
