

Roundtable Working Groups Air and Climate/Land Use Working Group Joint Session

Date: 15th January 2018
Time: 10:00am - 12:30pm
Venue: Orbit Business Centre, Rhydycar Business Park,
Merthyr Tydfil

Purpose

A workshop led joint discussion with the Air & Climate and Land Use sub groups to consider overlapping themes.

Objectives

To discuss and agree the following:

1. Quantifiable outcomes in relation to Air and Climate that can be delivered through changes to land management practice.
2. The two subsets of quantifiable outcomes: 1) those sought by legislation/regulation that we are we bound to deliver and 2) those relating to improvement over and above compliance limits.
3. The availability of evidence that demonstrates a causal connection between specific changes to land management practice and the delivery of the specific outcome/s.

Other points for consideration

Additionally, attendees will be invited to openly discuss the following:

- GHG reduction for the agriculture and Land Use, Land-Use Change and Forestry (LULUCF) sectors
- Bioeconomy (use of biomass from forests and agricultural land to replace fossil based materials – energy, plastics etc.)
- Emissions reduction from fertilizer/nutrient management/AD for slurry management
