Subject: Hendy Wind Farm

Good Evening,

I would like to know please,

What did you base your decision on for the Go Ahead for the Hendy Windfarm, Llandegley, Llandrindod Wells?

Bearing in mind you travel almost right past the picturesque Llandegley Rocks and through the beautiful countryside of Mid Wales on your way to Cardiff for Assembly, I would have thought you would have cared more about how much this development will impact on this stunning part of the country. I also wish for you to note that the development has already starting which is breaking the law as certain planning permissions have still not been past.

I'll also inform you that, the number of tourists to this part of Wales, that are brought in, partially due to the Llandegley Rocks being the first sight of Wales when travelling from the east is phenomenal. You'll be able to see these Turbines from Approximately 20miles away. That's a 20mile radius of the view of picturesque valleys, in the centre of Wales, ruined! Just 3 months ago we saw a group of 100 Walkers turn up in this area, whom had come here partially due to this particular sight of significant interest.

By passing this development, not only have you ruined the picturesque views of rural mid Wales, but ruined the lives of those running businesses that rely on the tourists that would visit, because of the Llandegley Rocks. Can you not see that this is all about Money and is not what's right for this Area? Do you really believe that by creating a little bit more energy and billions of pounds overweighs loosing Tourists attractions, that bring people into Wales?

I would like to ask that you fully respond to me by email yourself, as I would like the answers from you individually and not from those of a secretary. This is a crucial matter that needs to be stopped, whether you like it or not.

Many Thanks,
Mr Williams
