8	Percentage of voluntary organisations offering family welfare and childrens activities	Percentage of voluntary organisations offering family welfare and childrens activities	Wales Council for Voluntary Action Third Sector Statistical Resource	NA	Data available on request	Ad-hoc
9	Percentage of adult service users receiving a direct payment	Percentage of adult service users receiving a direct payment. For further technical information on the Adults receiving care and support return please see: <a href="https://gov.wales/docs/statistics/2018/181030-adults-receiving-care-support-2017-18-en.pdf">https://gov.wales/docs/statistics/2018/181030-adults-receiving-care-support-2017-18-en.pdf</a>	Adults receiving care and support local authority data return	<a href="https://stats.wales.gov.wales/Catalogue/Health-and-Social-Care/Social-Services/Adult-Services/Service-Provision/adultsreceiving-services-by-localauthority-agegroup">https://stats.wales.gov.wales/Catalogue/Health-and-Social-Care/Social-Services/Adult-Services/Service-Provision/adultsreceiving-services-by-localauthority-agegroup</a>	Yes - On StatsWales	Annual
<b>Physical and mental health and emotional well-being</b>						
10	Percentage of people with high happiness scores	This indicator is a measure of people's evaluation of their own lives and their assessment of their own emotional well-being. This is one of the four measures of well-being created by the Office for National Statistics; people are asked 'how happy did you feel yesterday?' It will be possible to assess whether there is a difference in the scores between people who have received care and support and carers who received support in the last 12 months and those who have not received care and support services. For further technical information on the National Survey for Wales please see: <a href="https://gweddill.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en">https://gweddill.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en</a>	National Survey for Wales	<a href="http://gov.wales/statistics-and-research/national-survey">http://gov.wales/statistics-and-research/national-survey</a>	Yes - Not on StatsWales	Biennial for breakdowns required (those who receive care and support, carers and those who do not receive care and support) - Biennial
11	Percentage of people with high life satisfaction scores	This is one of the four measures of well-being created by the Office for National Statistics, and people are asked 'how satisfied are you with your life nowadays?' It will be possible to assess whether there is a difference in the scores between people who have received care and support and carers who received support in the last 12 months and those who have not received care and support services. For further technical information on the National Survey for Wales please see: <a href="https://gweddill.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en">https://gweddill.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en</a>	National Survey for Wales	<a href="http://gov.wales/statistics-and-research/national-survey">http://gov.wales/statistics-and-research/national-survey</a>	Yes - Not on StatsWales	Biennial for breakdowns required (those who receive care and support, carers and those who do not receive care and support) - Biennial

12	Mean mental well-being score for people.	<p>For adults (aged 16 or over), the mean mental well-being score according to the Warwick-Edinburgh Mental Well-being Scale (WEMWBS).  <a href="http://www2.warwick.ac.uk/fac/med/research/platform/wemwbs/">http://www2.warwick.ac.uk/fac/med/research/platform/wemwbs/</a></p> <p>The Warwick-Edinburgh Mental Well-Being Scale (WEMWBS) was included in the 2016-17 National Survey to give information on mental well-being. Respondents were asked a series of statements, and based on their answers a score of between 14 (lowest mental well-being) and 70 (highest) was assigned. The 2016-17 average mental well-being score in Wales was 51. For analysis purposes we grouped these scores; below average mental well-being (scores 14 to 44), average well-being (scores 45 to 57), and above average mental well-being (scores 58 to 70).</p> <p>For further technical information on the National Survey for Wales please see:  <a href="https://gweddl.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en">https://gweddl.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en</a></p>	National Survey for Wales	<a href="http://gov.wales/statistics-and-research/national-survey">http://gov.wales/statistics-and-research/national-survey</a>	The data is not available for this indicator based on the Warwick-Edinburgh Mental Well-being Scale, however the Welsh Health Survey has included a standard set of 36 health status questions known as SF-36 (version 2) asking about perceptions about their mental health from 2003 to 2015	Adults - annual Children - approx every 2 years
13	Percentage of adults who have fewer than two healthy lifestyle behaviours (not smoking, healthy weight, eat five fruit or vegetables a day, not drinking above guidelines and meet the physical activity guidelines)	Percentage of adults (aged 16+) who have fewer than two healthy lifestyle behaviours (not smoking, healthy body mass index, eat five portions fruit or vegetables, not drinking above guidelines, meet guidelines on weekly minutes of physical activity). For further technical information on the National Survey for Wales please see: <a href="https://gweddl.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en">https://gweddl.gov.wales/statistics-and-research/national-survey/design-methodology/technical-information/?lang=en</a>	National Survey for Wales	<a href="https://gweddl.gov.wales/statistics-and-research/national-survey/?tab=el_home&amp;topic=population_health&amp;lang=en">https://gweddl.gov.wales/statistics-and-research/national-survey/?tab=el_home&amp;topic=population_health&amp;lang=en</a>	Yes - On StatsWales	Annual
14	Percentage of children receiving care and support with mental health problems	The Census collected individual records on all children receiving care and support, including those looked after by a local authority, who had an open case with a local authority on the 31 March that had been open for the three months from 1 January to 31 March. The purpose of the Census is to collect data that measures the characteristics and attributes of children receiving care and support who receive social services from their local authorities, including children looked after by local authorities. The census focuses on the reason why children receive help from social services departments, parental capacity, and on the health and education outcomes for each child.	Children receiving care and support census	<a href="https://statswales.gov.wales/Catalogue/Health-and-Social-Care/Social-Services/Childrens-Services/children-receiving-care-and-support/mentalhealthstatusofchildrenreceivingcareandsupport-by-localauthority-measure">https://statswales.gov.wales/Catalogue/Health-and-Social-Care/Social-Services/Childrens-Services/children-receiving-care-and-support/mentalhealthstatusofchildrenreceivingcareandsupport-by-localauthority-measure</a>	Yes - On StatsWales	Annual
15	Percentage of live single births with a birth weight of under 2,500g	Low birth weight is associated with health risks in an infant's first year of life. The indicator will be based on singleton births (with a stated birth weight) and will be calculated as the percentage of births that are <2,500 grams.  Denominator: All singleton live births.	National Community Child Health Database	<a href="https://gov.wales/births-data-national-community-child-health-database-2017">https://gov.wales/births-data-national-community-child-health-database-2017</a>	Yes - On StatsWales	Annual
16	Percentage of children receiving care and support with up-to-date immunisations	The Census collected individual records on all children receiving care and support, including those looked after by a local authority, who had an open case with a local authority on the 31 March that had been open for the three months from 1 January to 31 March. The purpose of the Census is to collect data that measures the characteristics and attributes of children receiving care and support who receive social services from their local authorities, including children looked after by local authorities. The census focuses on the reason why children receive help from social services departments, parental capacity, and on the health and education outcomes for each child. <b>Domestic, Family and Personal</b>						
33	Percentage of people reporting overall, emotional and social loneliness	Various measures of loneliness can be used for data analysis purposes but the National Survey uses the De Jong Gierveld This is calculated using De Jong Gierveld loneliness scale - see terms and definitions 6-point loneliness scale. For this scale, respondents were shown a series of 6 statements and asked to indicate, the extent to which each statement applied to the way they felt. There were 3 statements about 'emotional loneliness (EL)' and 3 about 'social loneliness (SL)'.  1. I experience a general sense of emptiness (EL) 2. I miss having people around me (EL) 3. I often feel rejected (EL) 4. There are plenty of people I can rely on when I have problems (SL) 5. There are many people I can trust completely (SL) 6. There are enough people I feel close to (SL)  The scale uses three response categories: Yes / More or less / No - where the neutral and positive answers are scored as "1" on the negatively worded questions (in this instance, questions 1-3). On the positively worded items (questions 4-6), the neutral and negative answers are scored as "1". This means that an answer of 'more or less' is given the same score as 'yes' or 'no', depending on the question.  The scores for each individual question are added together to provide an overall loneliness measure. This gives a possible range of scores from 0 to 6, where 0 is least lonely and 6 is most lonely. For reporting purposes in this bulletin we have considered people who have a score of 4 to 6 as being lonely. 38	Percentage of people who Volunteer.	Percentage of people (aged 16+) who volunteer: measured by the percentage of adults who give their time for free to help clubs or organisations (formal or informal); or who support family members, friends, neighbours or others because of long-term physical or mental ill-health or disability, or problems related to old age.	National Survey for Wales	<a href="http://gov.wales/statistics-and-research/national-survey">http://gov.wales/statistics-and-research/national-survey</a>	Yes - Not on StatsWales	Annual until 2017-18, but trend data to be reviewed to determine frequency from 2018-19
39	Percentage of voluntary organisations offering community or youth activities	This indicator measures the percentage of voluntary organisations offering activities for the local community and activities for younger people. Community activities include groups working to regenerate their local communities, improving local access to services, community newsletters and development programmes. Youth activities include groups that involve young people, youth centres, young farmer's clubs, uniformed organisations and cultural groups.	Wales Council for Voluntary Action Third Sector Statistical Resource	N/A	Available on request	Ad-hoc
40	Percentage of voluntary organisations offering disability activities	The third sector complements statutory services by supporting seamless service provision and providing services for the benefit of people and communities in Wales. This indicator measures the percentage of voluntary organisations offering disability services, which provide support for people with disabilities and their families and to help empower people with disabilities to live in the community.	Wales Council for Voluntary Action Third Sector Statistical Resource	N/A	Available on request	Ad-hoc
<b>Social and economic well-being</b>						
41	Percentage of people living in households in material deprivation.	Material deprivation is a measure which is designed to capture the consequences of long-term poverty on households, rather than short-term financial strain.  Non-pensioner adults were asked whether they had things like 'a holiday away from home for at least a week a year', 'enough money to keep their home in a decent state of decoration', or could 'make regular savings of £10 a month or more'. The questions for adults focussed on whether they could afford these items. These items are really for their 'household' as opposed to them personally which is why they were previously called 'household material deprivation'.  Pensioners were asked slightly different questions such as whether their 'home was kept adequately warm', whether they had 'access to a car or taxi, when needed' or whether they had their hair done or cut regularly'. These also asked whether they could afford them, but also focussed on not being able to have these items	National Survey for Wales	<a href="http://gov.wales/statistics-and-research/national-survey">http://gov.wales/statistics-and-research/national-survey</a>	Yes - Not on StatsWales	Annual until 2017-18, but trend data to be reviewed to determine frequency from 2018-19

		<p>for other reasons, such as poor health, or no one to help them etc. these questions were less based on the household and more about the individual.</p> <p>Those who did not have these items were given a score, such that if they didn't have any item on the list, they would have a score of 100, and if they had all items, they had a score of 0. Non-pensioners with a score of 25 or more were classed as deprived and pensioners with a score of 20 or more were classed as deprived.</p> <p>Parents of children were also asked a set of questions about what they could afford for their children.</p> <p>In this bulletin the non-pensioner and pensioner measures of deprivation are combined to provide an 'adult' deprivation variable. The terms 'adult' and 'household' deprivation may be used interchangeably depending on context.</p>
