**Subject:** Barry Biomass Energy Facility

Hywell,

I have been asked by Douglas Wardle of Power Consulting Midlands to get in touch with you to discuss the approach to the planning situation with the Barry Docks biomass energy plant.

I am a planning consultant specialising in energy and waste development, and work with sol Environment who are working on the Permitting side of the plant. They have asked me to assist with drawing together the comparison between the original voluntary EIA and the subsequent development changes.

I wonder if we could speak on the phone at a time to suit your diary, to help me better understand your expectations for the document we will produce.

By all means email me to arrange a convenient time, or give me a ring on 07834 518263.

Many thanks,

Simon Greaves
