**Subject:** Further advice  
**Importance:** High

Hi,

We're working towards a position on the net-zero advice but Ministers and Special Advisors have expressed some concern that accepting the 95% recommendation would be seen as less ambitious than the Scotland and UK targets (while accepting that the CCC advice explains why Wales is lower). As part of the CCC's advice for Wales next year, would it be possible to get some more detailed advice on where and how Wales could achieve net-zero, for example more detail on the Agriculture sector?

Thanks,

Hi,

Yes, I think we could provide further advice on that.
