Test. Trace. Protect.
To keep Wales safe.

What do you need to do?

1. You develop at least 1 coronavirus symptom: a new continuous cough; high temperature; or loss of smell or taste.

2. You and members of your household should follow self-isolation guidance.

3. Take a test within the first 5 days of developing symptoms, when the test is most effective. Apply for a test here.

4. If the test is negative, no further action is needed by you or others in the household. You no longer need to self-isolate. If the test is positive, you will be contacted by a contact tracer on behalf of the NHS Wales Test, Trace, Protect service. You will only be contacted after you have had a positive test.

5. You will be asked to provide us with information. We will need to know who you've been in contact with and where you've been in the two days before your symptoms started until now.

6. If you've been within 1m of someone for 1 minute or longer or within 2m of someone for 15 minutes or longer, you'll need to tell us about them. You'll also need to tell us about anyone you've travelled in a vehicle with, or people who've sat near you on public transport.

Please be vigilant for scam callers. We will never ask you for any financial information, bank details, or passwords. If in any doubt, do not provide the information. Texts will be sent from +447775106684, emails will be sent from tracing@wales.nhs.uk / olrhain@wales.nhs.uk, and calls will be made from 02921 961133. No other channels will be used by the NHS Trace, Test, Protect team.

7. Your contact will only be advised to take a test if they are displaying symptoms. Testing asymptomatic people is not recommended as it can generate false negatives. If they test positive, the process will be repeated for this person, their household members and contacts.

TRACE YOUR MOVEMENTS. STOP THE SPREAD.
TOGETHER WE'LL KEEP WALES SAFE.
