Subject: RE: 20/0748 - Uskmouth Power Station Conversion - Potential Call-in

Hello Ceri

The plans already showed this:

There is 3m between the ground level and the “vibrating floor” of the silo.

Regards

Hi Joanne

NRW most recent letter suggests a condition - *Condition 7: Secure implementation of approved plans demonstrating the primary storage silos are above predicted flood levels.* With regard to that condition, can you confirm that the developer submitted revised plans showing the elevation of the storage areas out of the flood plain?

Thanks

Ceri
