Re : Proposed Wind Farm At Rhoscrowther

Dear Sir

I wish to formally OBJECT to the proposed development in this area.

This subject has been refused several times has gone to appeal and been rejected it seems to me that no matter how time it fails to get sufficient local approval these plans still pop up again.

Why has this new slightly amended proposal been allowed to be raised again?

This is an on shore site in full view of several local communities in or close to a Welsh National Park. There is a off shore site been proposed and under development in a far more suitable location at SEA.

I do not object to wind farms in principal though the location in this case is unsuitable.

Best regards

A S Goodman
