Iddyn Nhw

Yn newid y drefn torri glaswellt er lles natur

Rydyn ni'n newid pa mor aml rydyn ni'n torri'r glaswellt.

Mae amgylchedd naturiol Cymru'n dirywio. Felly, rhaid gweithredu nawr i'w achub. Mewn rhai ardaloedd, byddwn yn torri'r glaswellt yn llai aml. Bydd hynny'n sicrhau bwyd a chysgod i anifeiliaid gwyllt ac yn rhoi cyfle i flodau gwyllt brodorol hadu a ffynnu.

Diben newid y drefn torri yw achub natur, nid lleihau costau.

It's for Them

Changes to mowing to save wildlife

We are changing how often we cut the grass.

Wales' natural environment is in decline. We urgently need to take action to save it. In some areas, we will cut the grass less often. This will provide food and shelter for wildlife and allow native wildflowers to produce seeds and flourish for years to come.

Changes to mowing is about saving wildlife, not reducing costs.

Iddyn Nhw

Yn newid y drefn torri glaswellt er lles natur

Rydyn ni am droi'r tir hwn yn ddôl blodau gwyllt. Mae amgylchedd naturiol Cymru'n dirywio. Rhaid gweithredu nawr i'w achub, felly rydyn ni'n newid y drefn torri glaswellt ar y darn hwn o dir. Daw'n gartref i amrywiaeth o blanhigion ac anifeiliaid ond bydd angen sawl blwyddyn iddo droi'n ddôl blodau gwyllt. Diolch am eich amynedd a'ch cefnogaeth.

Diben newid y drefn torri yw achub natur nid arbed costau.

It's for Them

Changes to mowing to save wildlife

We are turning this area into a wildflower meadow. Wales' natural environment is in decline. We urgently need to take action to save it so we're changing how we mow this area. It will become a home for a wide range of plants and animals. It may take several years to become a wildflower meadow. Thank you for your patience and support.

Meadow creation is about saving wildlife not costs.
