Programmes Directory 2024/25

<u>Contents</u>

1. Changes to note from Previous Version

A. New Programmes

There are new programmes added for delivery from 2024/25 in the following areas:
- Work Experience Placements (WEP) – see section 3. K.
- Occupational Qualifications (OccQs) – see section 7.
- Personal Learning Accounts (PLA) – see section 8.

B. Future Developments and Version Control

This background note to the Programmes Directory will be updated annually, or if and when there are any amendments required to the programme aims or requirements (e.g. a change to the requirements of the core). Any such changes would usually be made in consultation with the sector and communicated to all providers in advance of this background note being updated.

C. Programme Amendments

The Programme Amendments Process enables providers to amend existing programmes or provide rationale for the introduction of new programmes.

Where a programme needs amending or cannot be identified in the Directory, providers should contact the Post-16 Planning and Funding Team, to request a 'Programme Directory Amendment Form'. Requests may be submitted at any point throughout the year.

Providers should note that any programme amendments must be countersigned by the Head of Institution (Further Education Institutions) or Director of Education (Local Authorities).

2. Background and Content

This note sets out the background, content, and programme details for post-16 programmes of learning.

A. Background

A programme approach to funding is based on a package of learning with the intended outcome for the learner to progress either onto further or higher education or into employment.

Programmes are the main vehicle for funding, planning, delivery and monitoring under the Post-16 Planning and Funding Framework. Each eligible programme attracts a funding value that is used to plan, monitor and account for the use of funds.

Programmes are also being used to engage with Regional Skills Partnerships and external providers on the configuration of provision in Wales and strategies for the development of that provision to meet current and emerging needs.

At the end of each academic year programmes will be monitored to understand how effective the learning offer is against defined purposes and outcomes. This process will highlight programmes which are underperforming and, potentially, identify areas where there is a shortage or demand for provision.

The Directory has been developed to bring together all of the key dimensions of eligible programmes into one document that will be used for engagement with the sector, and to confirm the list of programmes that are eligible for funding.

Learning programmes and activity that are eligible for post-16 funding are based on the premise that they prepare learners for and lead to the opportunity to obtain Approved or Designated qualifications that are regulated by Qualifications Wales and are listed on the Qualifications in Wales (QiW) database.

B. <u>Content</u>

This document sets out the purpose for each level and type of programme, and a summary of each of the components of a full-time learning programme: the Core, the Main qualification(s), the Community Learner Industry Focus (CLIF) and Work-Related Experience (WRE).

Annex A to this document contains a full list of eligible programmes as of May 2024, for the 2024/25 academic year. This includes vocational, general education and part-time learning activities that are eligible for funding, along with programme codes, programme values and, where applicable, details on the funded programme hours.

The Programmes Directory is available on-line via LLWR Inform. This on-line version will be kept up-to-date throughout the year with any new agreed programmes.

3. <u>Full Time Programme Aims</u>

Each programme is designed with a defined aim which recognises that individual learners may have different purposes for learning.

A. <u>Entry Level Programmes</u>

The aim of an Entry Level programme is to introduce and engage learners in further education, in order to develop and apply basic essential and practical vocational skills, and also to provide learners with the opportunity to re-engage with society through second chance learning.

Entry level programmes should prepare a learner for progression to level 1 studies.

B. Level 1 Programmes

Level 1 programmes recognise basic knowledge and skills. Their aim is to engage learners at foundation level and further develop essential and practical vocational skills with the view of progressing to Level 2 study within a chosen vocational area, a Foundation Apprenticeship or employment.

C. Level 1-2 Accelerated Learning Programmes

Level 1-2 accelerated learning programmes increase the standard number of hours of learning for learners identified as having the ability to complete a level 2 qualification but may require some level 1 development in the vocational area before they are fully ready.

Learners are ineligible for this programme where they have already <u>undertaken</u> a level 1 in the same Subject Sector Area.

Level 1 learning planned en-route to gaining the level 2 should be clearly identified in the learner's individual learning plan. As part of the monitoring process, the activities delivered as part of the programme will be reviewed to help identify the additional learning that the learner has undertaken.

Learners on a level 1-2 accelerated learning programme will be subject to the same performance measures as a level 2 learner.

D. Level 2 Programmes

Level 2 programmes recognise a proficient level of knowledge and understanding about a particular area. The skills and knowledge gained at this level should prepare the learner for progression to further study at level 3 within Further Education, employment or an apprenticeship.

For construction programmes, the level 2 is separated into:
- Foundation: a Level 2 programme that recognises a broad level of knowledge and understanding of the wider sector area, providing learners with opportunity to progress to more specific level 2 study or progression onto a level 3 apprenticeship within a chosen vocational area.
- Progression: a Level 2 programme that recognises a proficient level of knowledge and understanding of a particular area. The purpose of the programme is to build on the practical vocational skills of a learner's chosen pathway, with the view to progress to level 3 study within the chosen vocational area or an apprenticeship.

E. Level 2-3 Accelerated Learning Programmes

Level 2-3 accelerated learning programmes increase the standard number of hours of learning for learners identified as having the ability to achieve a level 3 qualification but may require some additional level 2 learning to achieve this in two years. The additional

level 2 learning should be clearly identified in the learner's individual learning plan and undertaken in the first part of the programme. In the second part, learners will continue towards the full level 3 programme.

Learners who have already <u>undertaken</u> a level 2 in the same Subject Sector Area are not eligible for this programme.

Learners on a level 2-3 accelerated learning programme will be subject to the same performance measures as a level 3 learner.

F. <u>Level 3 Programmes</u>

Level 3 programmes are typically delivered over two years and develop the breadth and depth of essential and employability skills, recognising the ability to gain and use a range of knowledge and skills. Through undertaking a level 3 programme, learners will be prepared for either further study at level 4 within FE or HE, for employment or for a higher apprenticeship.

For planning, funding and monitoring purposes, extension codes should be used in addition to the standard programme code to identify whether learners are on year 1 or year 2 of a two-year programme (see section 10).

G. <u>Level 4 Programmes</u>

Level 4 Programmes are higher education courses that develop specialist knowledge in a chosen subject area. The expected outcome of level 4 programmes is further study at University to complete a full degree, employment or a higher apprenticeship.

H. <u>Access to FE Programmes</u>

Access to FE Programmes are designed for learners who may have enrolled later in the academic year and/or are uncertain of their chosen pathway. The programme allows for vocational tasters. The purpose of the Access to FE programme is to allow the learner to develop essential and practical vocational skills and to confirm a chosen route.

I. <u>Access to HE Programmes</u>

Access to HE Programmes are aimed at learners with life experience outside of education, who wish to access University provision, but may not have the necessary qualifications to do so. Access to HE programmes are available in a range of pathways and should aim to develop the knowledge, skills and confidence to prepare a learner for progressing onto university study in their chosen route.

J. <u>Learner Recovery and Progression Funding</u>

This additional funding is available in recognition that learners will have experienced disruption as a consequence of the COVID-19 pandemic. As such, they may require further support and guidance to help safeguard their wellbeing, develop resilience and

successfully achieve qualifications. Learners can undertake learning on a 1:1 basis, group-based or a mixture of both.

I.   Local Authorities

Delivery will be monitored via data submitted through spreadsheets identifying group-based and/or 1:1 hourly funding.

II.   Further Education Institutions

Delivery will be monitored via data submitted through LLWR identifying group-based and/or 1:1 hourly funding. Where learners are undertaking additional Learning Recovery and Progression hours alongside their full-time programme, these hours should be recorded separately on LLWR as part-time programme(s).

III.   Group Based Learning

For group-based learning, the programme code should relate to the sector of the full-time programme. For example, if a learner on a Health and Social Care programme is undertaking additional group-based hours, then the **estimated number of hours (LP69)** should be recorded against code 0100XXXR. Please note that where the additional hours programme code does not match the sector area of the full-time programme, these hours will be shown as ineligible on the funding report.

In line with all programmes, where a learner drops out within the first 8 weeks, no funding will be assigned to that learner.

Once the additional group-based hours have been fully delivered, the **actual number of hours (LP71)** should be updated to reflect hours delivered. This needs only to change from LP69 where there is a meaningful change to the original timetabled estimated hours. It does not need to change to reflect that a learner was not in attendance for two weeks, for example.

IV.   1:1 Learning

For 1:1 hours, the programme code 9900XXXR should be used. This is irrespective of the subject sector area of the full-time programme. The **estimated number of hours (LP69)** should be recorded against this programme code.

Once the additional 1:1 hours have been fully delivered, **the actual number of hours (LP71)** should be updated to reflect the actual hours delivered and should correspond to the respective institution's internal monitoring systems that log the 1:1 support.

K. Work Experience Placements

This is a direct replacement for the previous Innovation Programmes funding. The main aim of the Work Experience Placements is to provide support to Further Education Institutions to work collaboratively to explore new ways of learning and to develop and

expand existing activities, resources or programmes in a way that best support learner uptake and/or outcomes. Three separate programmes are approved for delivery:

- Futures Programme
- Placement Enhanced Programme
- Priority Sector Skills Academies

Each of the Work Experience Placements Programmes has a separate specification. Copies are available on request from the Post-16 Planning and Funding Team.

Programme delivery and learning outcomes will be monitored via the relevant full-time and part-time LLWR Inform reports.

L. Increased Workplace Learning Programmes (All Levels)

Increased workplace learning programmes offer an increment in the standard number of hours of learning in order to increase the amount of workplace learning in a programme with the aim of making more learners work ready. The programme does not aim to offer two weeks of 'work experience', but to provide regular contact for the learner with an employer for the duration of their learning programme.

M. Enhanced Programmes

Enhanced Programmes are available at either levels 2 or 3 in these following areas: AS Levels (3 or 4 subjects with or without the Welsh Baccalaureate element), Engineering, Information Technology, Digital and Future Media. Their main aim is to prepare participants for entry into employment via the Apprenticeship Programme where they will work within an Apprenticeship framework.

Enhanced Programmes increase the standard number of hours of learning delivered by Further Education Institutions from a minimum of 16 hours per week up to a maximum of 30 hours per week, to cover a set curriculum that meets the needs of employers, deliver qualifications to learners that will fulfil identified employer needs within the region and utilise direct employer engagement through the work placement element of the learning programmes.

Each of the Enhanced Programmes has a separate specification, comprising entry requirements. Copies are available on request from the Post-16 Planning and Funding Team.

N. Junior Apprenticeships

Junior Apprenticeships offer year 10 and 11 pupils the opportunity to study full-time for a future career, in a college setting, from the age of 14. They function as a two-year programme of work-related education with work experience built in, alongside a Level 2 course that is equivalent to four or five GCSEs, in a range of different vocational pathways. Each apprentice also studies GCSEs in Maths and English alongside their chosen area. There are a number of programme codes in the directory to reflect the different Junior Apprenticeship pathways.

Each Junior Apprentice should have access to support with teaching and learning, help with behaviour management, and a designated Welfare Officer to support day to day issues and provide pastoral care.

The aim of the Junior Apprenticeship is to make the learner employable or ready to progress onto a higher-level vocational course or apprenticeship at the age of 16.

The Junior Apprenticeship Programme is primarily funded by the Local Authority and therefore it is essential that agreement is reached between the LA and the College before this provision is agreed.

4. Full Time Programme Requirements – Vocational Programmes (Excluding Access to HE and Level 4)

Programmes of learning are made up of four components:
- Main Qualification(s);
- Core;
- Community Learner Industry Focus (CLIF); and
- Work Related Experience (WRE).

A. Main Qualification(s)

Main qualifications within learning programmes must be selected from those listed on the QiW database within the Approved or Designated categories of qualifications and must relate to the learning area of the programme.

QiW remains the main point of reference database for all regulated qualifications that are eligible for post-16 funding in Wales, including approved and designated qualifications primarily aimed at learners under 19 years old. The database can be accessed via the following link: Qualifications in Wales (qiw.wales)

Main qualifications must account for over 50 percent of the total Guided Contact Hours (GCH) for the programme, the ideal target being 70 percent of the total GCH.

B. Core

All learners should be supported to make progress in their numeracy and literacy skills throughout their programme of learning. Learners can progress their skills through either; or a combination of; undertaking the Skills Challenge Certificate; either stand alone or as part of their Welsh Baccalaureate; GCSE resits or a minimum of 2-3 Essential Skills Wales qualifications, in line with the Wales Essential Skills Toolkits (WEST) assessment result for each learner, plus tutorial time.

Learners on a level 3 programme should undertake the Skills Challenge Certificate (and associated Welsh Baccalaureate) and should be entered for the Advanced level, not a lower level. In exceptional circumstances, where a specific learner is not undertaking

the Welsh Baccalaureate, they are required to undertake, as a minimum, two or three Essential Skills Qualifications at the relevant level based on the outcome of their WEST assessment.

Non-Welsh Baccalaureate programmes have a minimum requirement of two or three Essential Skills, together with tutorial time and work-related experience. The requirements are defined for each learning area and level.

The level of Essential Skills may be different to the main qualification(s) based on the outcomes of initial/diagnostic assessment for each learner. Essential Skills units may be at the same level or one level above or below, but learners should develop the level of skills required to achieve the main qualification.

I. *GCSE Resits*

Learners aged 16-19 who are working towards a C grade in GCSE Maths, English or First Language Welsh as part of their programme of study are not required to undertake separate Essential Skills in Communication and Application of Number alongside each GCSE.

There may be specific circumstances where separate Essential Skills are required, e.g. in order to achieve a main qualification or to facilitate progression to an apprenticeship or higher apprenticeship.

C. Community Learner Industry Focus (CLIF)

This component of the programme should be tailored to meet the specific needs of the learner and local and specific employer needs. Qualifications delivered under the CLIF should add value to a programme by developing wider skills or by developing skills to a higher level to aid progression to employment or further study. CLIF is met through delivering Quality Assured Lifelong Learning (QALL) units or equivalent recognised learning listed on QiW and may be delivered at a lower or higher level than the main qualification.

Not all learners will need to undertake the CLIF as this may not be required where the main qualification has addressed the learner requirements fully. Providers have the flexibility to tailor the CLIF to provide additional support for individual learners to develop literacy and numeracy skills or personal and social skills.

D. Work Related Experience (WRE)

This component of a programme allows for provision of WRE. This includes time allocated to learners to develop and refine their practical skills, which should help them progress to employment or further learning.

The provision of WRE will vary across programmes to include activities that are part of the assessed component of a qualification in the vocational area.

A recommended number of work placement hours for each programme is provided within the 'Programmes Directory' at Annex A.

The planned work-based hours (LP70) for the duration of the learning programme should be estimated as accurately as possible at the start of a learner's learning programme and confirmed at the end within field LP72 (Actual Work Based Hours).

5. <u>Full Time Programme Requirements – General Education, Access to HE and Level 4</u>

Programmes of learning are made up of two components:
- Main Qualification(s); and
- Community Learner Industry Focus (CLIF).

A. <u>Main Qualification(s)</u>

Main qualifications within learning programmes must be selected from those listed on the QiW database and must relate to the learning area of the programme.

QiW remains the main point of reference for all approved and designated qualifications that are primarily designed for learners under 19 and are eligible for use within learning programmes. The database can be accessed via the following link: <u>Qualifications in Wales (qiw.wales)</u>

For Access to HE programmes, the main qualification will not be on QiW but should be a Quality Assurance Agency for Higher Education (QAA) approved qualification.

Main qualification(s) must account for over 50 percent of the total Guided Contact Hours (GCH) for the programme, the ideal target being 70 percent of the total GCH.

B. <u>Community Learner Industry Focus (CLIF)</u>

This component of the programme should be tailored to meet the specific needs of the learner, and local and specific employer needs. Qualifications delivered under the CLIF should add value to a programme by developing wider skills or by developing skills to a higher level to aid progression to employment or further study. CLIF is met through delivering Quality Assured Lifelong Learning (QALL) units or equivalent recognised learning listed on QiW and may be delivered at a lower or higher level than the main qualification.

Not all learners will need to undertake the CLIF as this may not be required where the main qualification has addressed the learner requirements fully. Providers have the flexibility to tailor the CLIF to provide additional support for individual learners to develop literacy and numeracy skills or personal and social skills.

C. <u>AS/A2 Equivalent</u>

Where there is no exact programme code, the following general rules should be applied:

- mixture of A2 and AS levels – make it an A2 equivalent
- mixture of AS and other qualifications (for example BTEC) – make it an AS equivalent
- mixture of A2 and other qualifications (for example BTEC) – make it an A2 equivalent
- where GCSEs are being undertaken as part of an A level or equivalent programme, it is expected that these GCSEs would be delivered as part of the CLIF element of the Learning Programme
- if a learner is undertaking a vocational programme but taking an AS-level to supplement it, the relevant vocational programme code should be used

6. Part Time Study

Part time study is available across all subject sector areas and levels and is based around learning activities rather than full programmes of learning. Part time study should generally be aimed at employed learners, focussing on their skills development or training / retraining needs.

Part time study is not fundable alongside full-time programmes of learning (other than GCSE Resits, Learner Recovery and Progression and Work Experience Placements). For any additional learning that a full-time learner would wish to undertake, it would be expected that the CLIF element of the full-time programme to be used.

7. Occupational Qualifications

This is a direct replacement for the previous 'NVQs Delivered in the Workplace' funding methodology. To meet the requirements for funding, qualifications must fully meet the following criteria:

- be designated and regulated by QiW
- be flagged as type 'Occupational Qualification' on QiW
- have sub-purpose on QiW set up as 'D1. Confirm competence in an occupational role to the standards required'

8. Personal Learning Accounts

The Personal Learning Accounts Programme is fundable via a 26 Tiers banding system, within which the approved qualifications are mapped.

The primary aim of the Personal Learning Account programme is to enable individuals who are in work to upskill and reskill in priority sectors, to improve their career and earnings potential, and to help raise the median income in Wales.

9. <u>Programme Hours</u>

The Programmes Directory outlines the number of hours that are funded for each programme of learning. It is not expected that Colleges deliver the exact number of hours for each area, but presents a general guide. It is however expected that total delivery hours are within a reasonable tolerance of the funded hours; for audit purposes this reasonable tolerance is considered 10%.

10. <u>Programme Code Requirements</u>

Programme codes are made up of 8 characters denoting the subject sector area, sub-sector, programme level and type of programme e.g., full time or part time. Programme codes are used not only for funding and planning purposes but are also used for monitoring and reporting purposes within the wider Welsh Government.

A. <u>2-Character Extensions to Programme Codes</u>

The 2-character extensions to programme codes are used for 2-year programmes to denote whether the learner is undertaking the first or second year.

For a learner undertaking the first year of a 2-year programme, the extension '12' should be used, and for a learners undertaking the second year of a 2-year programme, the extension '22' should be used.

For example, a learner undertaking the first year of an Animal Care programme at Level 3 should be registered with the following programme code:
- 0303B03B**12** This is year 1 of a 2-year programme.

While a learner undertaking the second year of a Business Administration programme at Level 3 should be registered with the following programme code:
- 1502A03B**22** This is year 2 of a 2-year programme.

Character extensions are not listed in the Programmes Directory report on LLWR Inform, but should be used, as appropriate, in providers' data returns. A full list of valid codes and the learning programmes to which they refer can be found at Annex A and under the *LLWR Lookups* heading on the documents page of LLWR Inform.

The codes will also be listed in the Technical Completion Notes for Local Authorities and Schools Post-16 Collection.

11. <u>Contact Details</u>

For any queries relating to any of the content of this background note to the Programmes Directory, please contact the Post-16 Planning and Funding Team at the following mailbox: Post16PlanningandFunding@gov.wales.
