

Index of Production and Index of Construction for Wales: 2016 Quarter 4

27 Apr 2017
SFR 43/2017

1. Background and key points

The Index of Production and the Index of Construction for Wales account for approximately 21 per cent and six per cent of the Welsh economy respectively. The Welsh Government also publishes a Welsh [Index of Market Services](#) quarterly statistical release which accounts for a further 45.8 per cent of the Welsh economy.

When comparing the year ending December 2016 to the year ending December 2015, the Index of Production **increased** for both Wales (2.9 per cent) and the UK (1.2 per cent). The increase in Wales was largely accounted for by an increase in output in *Other Manufacturing and Repair and Rubber and Plastics and other Non-metallic Minerals*, whilst the increase in the UK was largely accounted for by *Electricity, Gas and Water Supply*. When comparing the current quarter with the previous quarter, output increased in both Wales and the UK (by 8.8 per cent and 0.4 per cent respectively).

Chart 1.1: Index of production

Source: Short Term Output Indicators, Welsh Government and ONS

The Index of Construction for Wales **increased** by 8.0 per cent when comparing the year ending December 2016 to the year ending December 2015 whilst UK output increased by 2.4 per cent. When comparing the current quarter with the previous quarter, construction industry output increased in Wales by 0.9 per cent but increased in the UK by 1.0 per cent.

About this release

The Index of Production for Wales and the Index of Construction for Wales are quarterly indices showing short term movements in the output of companies in the production and construction sectors within Wales. This release includes data up to December 2016.

In this release

1. Background and key points	1
2. Index of production sector changes	3
3. Sub-indices of index of production	4
4. Index of construction	7
5. Key quality information	8
6. Appendix A: Sections of SIC	12
7. Appendix B: Reference tables	13

The Index of Production and the Index of Construction are two separate indices. The Index of Production covers sections B to E of the 2007 Standard Industrial Classification and the Index of Construction covers Section F:

- Section B: Mining and Quarrying
- Section C: Manufacturing
- Section D: Electricity, Gas, Steam and Air Conditioning Supply
- Section E: Water Supply; Sewerage, Waste Management and Remediation Activities
- Section F: Construction

The Index of Production is composed of three sub-indices, the largest of which is *Manufacturing* which accounts for 78.9 per cent. *Electricity, Gas and Water Supply* accounts for 19.3 per cent and *Mining and Quarrying* for 1.9 per cent.

The largest components within *Manufacturing* are *Other Manufacturing and Repair* and *Transport Equipment*, accounting for 14.9 per cent and 14.6 per cent of the Index of Production respectively. The smallest component within *Manufacturing* is *Textiles, Wearing Apparel & Leather* (1.5 per cent). For further information on the industry sections and sub-sectors see Appendix A.

Table 1.1 shows the Index of Production and Index of Construction for Wales. Percentage changes are provided to show the longer term trend (comparing the latest four quarters with the same period a year earlier) and the short term trend (showing the latest quarterly movement) for both Wales and the UK.

Table 1.1: Seasonally adjusted indices of output for Wales ⁽¹⁾

(2013=100)

	2015		2016				<i>Percentage change: Latest</i>			
	Q3	Q4	Q1	Q2	Q3	Q4	4 qtrs to previous 4 qtrs		qtr to previous qtr	
							Wales	UK ⁽²⁾	Wales	UK ⁽²⁾
PRODUCTION	105.3 (r)	104.3 (r)	103.8 (r)	107.1 (r)	102.3 (r)	111.3	2.9	1.2	8.8	0.4
Manufacturing	107.4 (r)	107.2 (r)	106.0 (r)	109.5 (r)	104.9 (r)	112.7	3.3	0.7	7.5	1.2
Mining and Quarrying	67.7 (r)	88.5 (r)	79.7 (r)	81.4 (r)	95.5 (r)	109.3	-0.9	0.6	14.5	-6.9
Electricity, Gas and Water Supply ⁽³⁾	100.8 (r)	94.0 (r)	97.5 (r)	99.8 (r)	92.3 (r)	105.7	1.7	3.4	14.5	2.6
CONSTRUCTION	102.8 (r)	106.5 (r)	108.3 (r)	111.4 (r)	109.4 (r)	110.4	8.0	2.4	0.9	1.0

(1) All series are seasonally adjusted. Please see Table B1 (Appendix B) for more detail on industrial sectors.

(2) UK figures for production as published by the Office for National Statistics on 31 March 2017 and UK figures for Construction as published by the Office for National Statistics on 10 March 2017.

(3) Relates to SIC 2007 Sections D - Electricity, Gas and Air Conditioning Supply and Section E - Water Supply; Sewerage, Waste Management and Remediation Activities.

(r) Data revised since last publication.

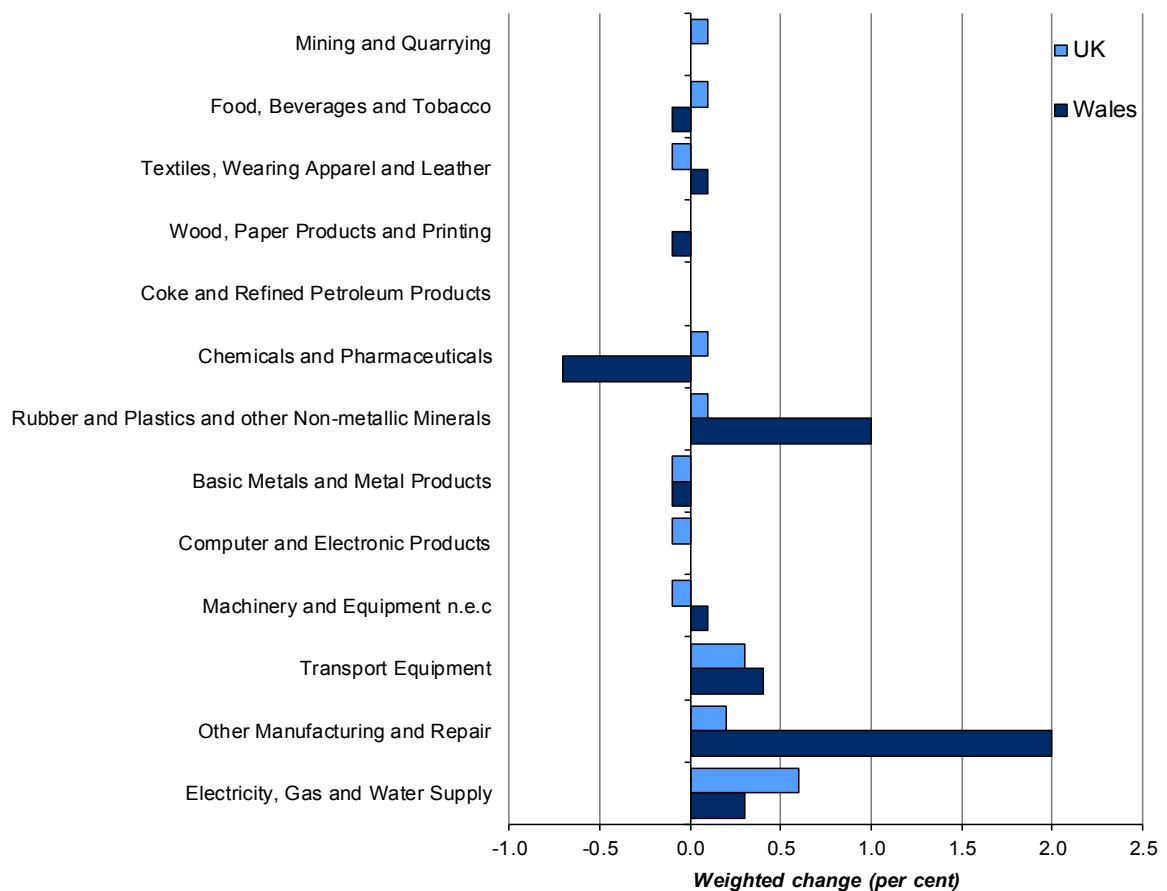

2. Index of production sector changes

This section examines the outputs of each industry within the Index of Production and their respective impact in proportion to the overall index.

Chart 2.1 shows a comparison of the weighted data for the year ending December 2016 to the year ending December 2015. The changes show the differences between each section's output and their respective impacts in proportion to their weighted contribution within the overall Index of Production. The weighted changes are derived by taking the proportion (weights) of each of the sub-sectors (using the 2013 GVA weights) and multiplying this by the difference in the time periods.

Six of the thirteen sub-sectors within the Welsh Index of Production have grown in output over the year ending December 2016 and four have declined. The contributions of three sub-sectors were unchanged (to one decimal place). *Other Manufacturing and Repair* and *Rubber and Plastics and other Non-metallic Minerals* showed the largest positive weighted change overall in Wales, whilst *Chemicals and Pharmaceuticals* has shown the largest negative weighted change.

Chart 2.1: Contribution to overall percentage change, latest four quarters compared with previous four quarters

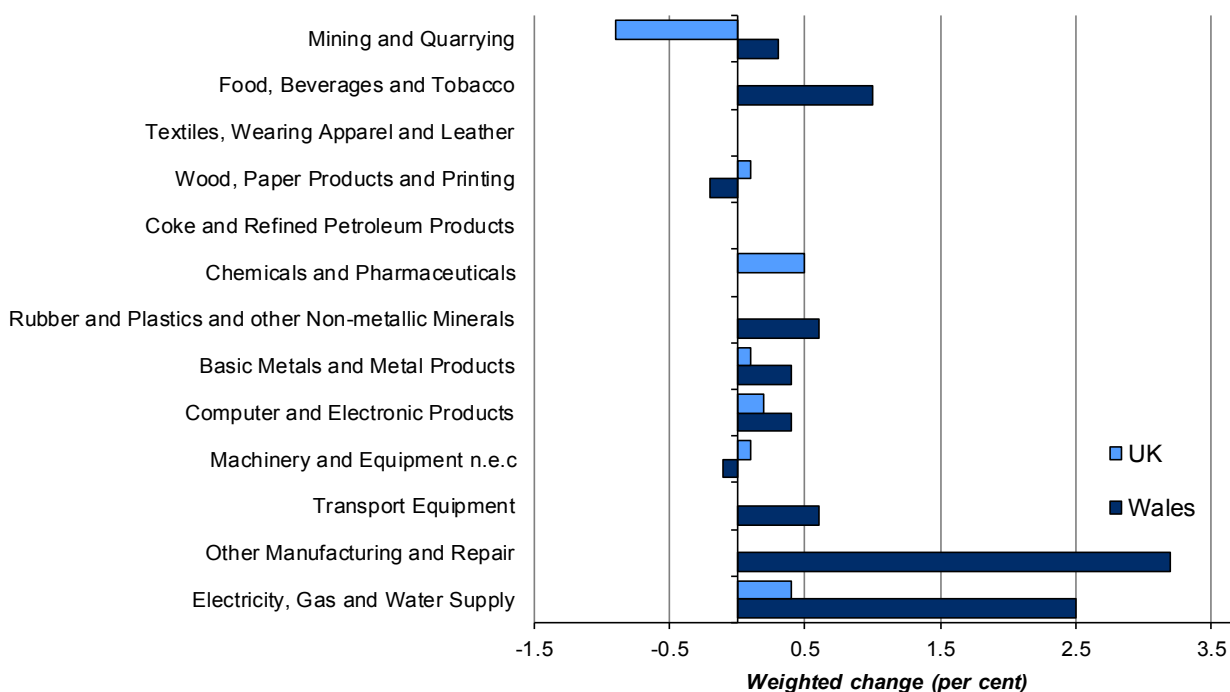

⁽¹⁾ Data rounded to one decimal place

Seven of the thirteen sub-sectors for the UK have grown in output over the year ending December 2016 and four sub-sectors have declined. The contributions of two sub-sectors were unchanged (to one decimal place). *Electricity, Gas and Water Supply* was the sub-sector with the largest positive weighted change in the UK whilst the largest negative change was in *Computer and Electronic Products*.

Chart 2.2 shows a comparison of the weighted data for the current quarter with the previous quarter. Eight of the thirteen sub-sectors within the Welsh Index of Production have shown growth over the quarter, two of the sub-sectors declined and three were unchanged. In the UK six of the thirteen sub-sectors showed growth in output, whilst one sub-sector declined and six were unchanged.

Chart 2.2: Contribution to quarterly percentage change, current quarter compared with previous quarter

⁽¹⁾ Data rounded to one decimal place

Source: Short-term Output Indicators, WG and ONS

The *Wood, Paper Products and Printing* sub-sector has shown the largest negative weighted change for Wales whilst *Other Manufacturing and Repair* had the largest positive weighted change. *Mining and Quarrying* had the largest negative weighted change in the UK whilst the largest positive change was in *Chemicals and Pharmaceuticals*.

3. Results for sub-indices of index of production

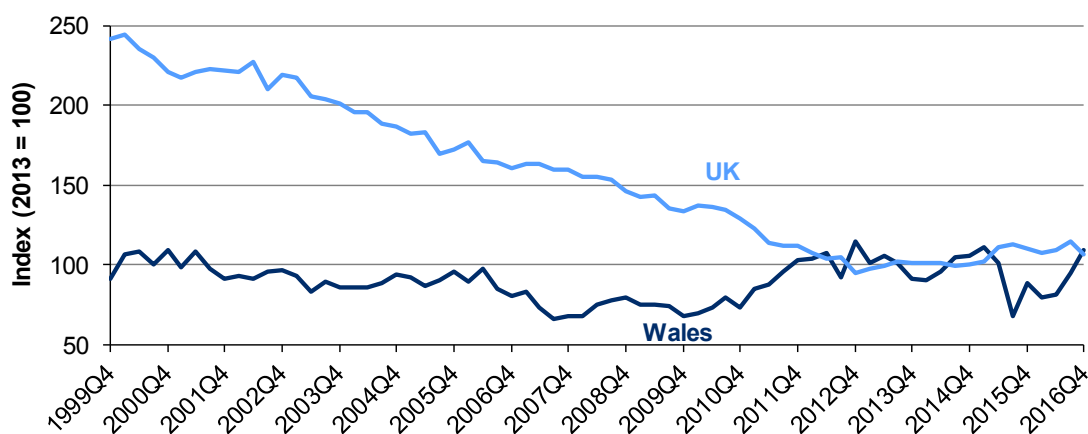

This section shows the latest results for the three sub-indices which comprise the Index of Production. References to the longer term refer to the year ending December 2016 compared to the year ending December 2015 and references to the short term refer to comparisons for the current quarter with the previous quarter. The Welsh results for some data series are more volatile than the UK counterparts because of smaller survey samples.

Table B1 in [Appendix B](#) shows the latest data with the percentage change over the short and longer term. Table B2 shows time series for the Index of Production and its sub-indices.

3.1. Index of mining and quarrying

The Index of Mining and Quarrying in both Wales and the UK fell overall between 1999 and 2009. It increased in Wales between 2010 and the end of 2012, which was attributed to increases in coal mining in Wales. The index for Wales has since fluctuated and increased overall. The UK continued to fall to the end of 2012 and has increased slightly since. (*Chart 3.1*)

Chart 3.1: Index of mining and quarrying

Source: Short-term output indicators, WG and ONS

The Index of Mining and Quarrying for Wales fell over the longer term by 0.9 per cent but increased over the short term by 14.5 per cent. The UK index increased over the longer term but decreased over the short term (up 0.6 per cent and down 6.9 per cent respectively).

3.2. Index of manufacturing

The Index of Manufacturing in Wales increased overall between the latter part of 2009 (after the recession of 2008-09) and the start of 2011, but did not reach pre-2008 levels. Since 2011, the index has increased overall and is now higher than the 2007 Q4 level. The UK has followed a similar pattern to Wales overall between 2009 and 2014 but during 2015 showed little change and is therefore below the Wales index. (*Chart 3.2*)

Chart 3.2: Index of manufacturing

Source: Short-term output indicators, WG and ONS

The manufacturing industry is typically the main driver of the production industries as it accounts for 78.9 per cent of the Index of Production. Manufacturing output over the longer term has increased in Wales and in the UK (up 3.3 per cent and up 0.7 per cent respectively). Over the short term, manufacturing output increased in both Wales and the UK (by 7.5 per cent and 1.2 per cent respectively). Tables B3a-c show a time series for the industry sub-sectors in the Index of Manufacturing.

3.3. Index of electricity, gas and water supply

The Index of Electricity, Gas and Water Supply in Wales fluctuated between 2006 and 2011. It increased in 2012 quarter 2, mostly due to the opening of a new power station in Pembroke. The output of this power station has continued to impact on this series since although the series has fluctuated. Output in the UK fell between 2008 and 2009 and has been broadly unchanged up to 2015. The UK index has since increased to its highest point of the series in 2016. (Chart 3.3)

Chart 3.3: Index of electricity, gas and water supply

Source: Short-term output indicators, WG and ONS

The Index of Electricity, Gas and Water Supply for Wales increased over the longer term and the short term by 1.7 per cent and by 14.5 per cent respectively. Output in the UK increased over the longer term and short term by 3.4 per cent and by 2.6 per cent respectively.

4. Index of construction

From 2008 (around the start of the recession of 2008-09) Wales had larger falls in output than the UK. Since the second quarter of 2010 output in Wales has fluctuated, but has increased overall. The UK increased overall in 2010 and was then broadly unchanged until the end of 2011. Output then fell until the start of 2013 and has increased since. (Chart 4.1)

Chart 4.1: Index of construction

Source: Short-term output indicators, WG and ONS

The Index of Construction for Wales increased over the longer term by 8.0 per cent and over the short term by 0.9 per cent. The UK index increased over the longer term by 2.4 per cent and over the short term by 1.0 per cent. Table B2 shows a time series for the Index of Construction.

5. Key quality information

5.1 Relevance

This release provides estimates of output in production and construction industries for Wales and the UK. The UK production estimates are taken from the Quarterly National Accounts release from the ONS. The construction estimates are taken from the ONS monthly construction release. These statistics are used by the Welsh Government to monitor the output for these industries in the Welsh economy as well as providing comparisons with the UK. They are also used by other public sector organisations, businesses, academia and private individuals to identify the key trends in production and construction output for Wales.

The Index of Production and Index of Construction show the quarterly movements in gross output of the production and construction sectors in Wales. Gross output is used as a proxy for Gross Value Added (GVA), measured by a variety of data sources since GVA cannot currently be measured to a sufficient timeliness for the production of short term indices.

The indices are estimated using a combination of:

- Directly collected data from existing monthly surveys.
- A quarterly top up of specifically Welsh data from large inter-regional businesses.
- Post stratification methodology.
- Volume data from a number of different sources.

The majority of the data comes from the ONS Monthly Business Survey. The results from this survey are used to calculate the relative movements of the individual series and these in turn are weighted together to produce the overall index. The weights are derived from the distribution of GVA for Wales using the Regional Accounts. Both volume and sales data are used to compile the index. GVA is a measure of economic activity at basic prices, which includes taxes (less subsidies) on production but excludes taxes (less subsidies) on products. The sales data are deflated to 2010 prices using the deflators produced for the UK index.

The following pie chart represents the percentage that the Index of Market Services, Index of Production and Index of Construction for Wales have in the overall Regional GVA by industry. Industries not covered include agriculture and fishing industries and the public sector.

Source: Short Term Output Indicators, Welsh Government and ONS

5.2 Accuracy

Estimates are subject to revision. Estimates on individual quarters fluctuate due to random sampling error and therefore it is recommended that emphasis is placed on changes in the average of the latest four quarters compared to the average of the previous four quarters for more volatile series. The entire time series is open to revisions arising from changes in the seasonally adjusted series from the addition of a new data point, and changes to the last 15 months turnover data from late or revised survey returns. More information on our [revisions policy](#).

Table 5.1 shows the revisions made (in index points) to the previous quarter's estimates.

Table 5.1: Comparison of current and previous estimates of 2016 quarter 3^a

	Production	Manufacturing	Mining & Quarrying	Electricity, Gas & Water	Construction
Current	102.3	104.9	95.5	92.3	109.4
Previous	101.8	104.6	91.9	91.5	108.9
<i>Revision</i>	<i>0.5</i>	<i>0.3</i>	<i>3.5</i>	<i>0.8</i>	<i>0.5</i>

Source: Short-term output indicators, WG and ONS

^a Numbers in the table have been rounded to one decimal place, therefore there may be slight discrepancies between the constituent items and the overall revision shown.

5.3 Timeliness and punctuality

This release is published quarterly. It is the earliest official indicator of the performance of the Welsh production and construction industries other than the UK figures which are produced by the Office for National Statistics monthly. There is approximately a 14 week lapse of time between publication and the period to which the release refers to.

5.4 Accessibility and clarity

This First Release and the headline statistics are available on the [Welsh Government Statistics website](#). Additional information on the Index of Production and Index of Construction is available on [StatsWales](#), in addition to the data from 1998. A Summary Quality Report containing information on the quality of the Index of Production and Index of Construction as well as a summary of methods used to compile the output is available on the background tab on the [Indices of Production and Construction](#) webpage.

5.5 Comparability and coherence

The UK and Wales estimates in this release are calculated by the Office for National Statistics (ONS) and are comparable as they use the same methodology. Methodologies relating to the components within the Index of Production and Index of Construction are available from the background information tab on the release webpage. The ONS are currently developing Regional Short term indicators for English regions. The Scottish Government publish a [GDP](#) measure in place of short-term output indicators. The Northern Ireland Assembly publish the Northern Ireland Composite Economic Index ([NICEI](#)), which is also not directly comparable to the Welsh short term output indicators.

Due to difficulties collecting historical data from contributors from earlier time periods, the time series begins in 1998 but early quarters and initial years include a proportion of estimated data. More information is given in the [Summary Quality Report](#).

Throughout the release references to the longer term refer to the latest four quarters compared to the previous four quarters, and references to the short term refer to the current quarter compared to the previous quarter. It is recommended that when looking at the growth rates of volatile series, users should focus on the percentage change over the longer term.

5.6 National Statistics status

The [United Kingdom Statistics Authority](#) has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the [Code of Practice for Official Statistics](#).

National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value.

All official statistics should comply with all aspects of the Code of Practice for Official Statistics. They are awarded National Statistics status following an assessment by the UK Statistics Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate.

It is Welsh Government's responsibility to maintain compliance with the standards expected of National Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.

5.7 Well-being of Future Generations Act (WFG)

The Well-being of Future Generations Act 2015 is about improving the social, economic, environmental and cultural well-being of Wales. The Act puts in place seven well-being goals for Wales. These are for a more equal, prosperous, resilient, healthier and globally responsible Wales, with cohesive communities and a vibrant culture and thriving Welsh language. Under section (10)(1) of the Act, the Welsh Ministers must (a) publish indicators ("national indicators") that must be applied for the purpose of measuring progress towards the achievement of the Well-being goals, and (b) lay a copy of the national indicators before the National Assembly. The 46 national indicators were laid in March 2016.

Information on indicators and associated technical information - [How do you measure a nation's progress? - National Indicators](#)

Further information on the [Well-being of Future Generations \(Wales\) Act 2015](#).

The statistics included in this release could also provide supporting narrative to the national indicators and be used by public services boards in relation to their local well-being assessments and local well-being plans.

(1) Revisions to the series are normally made each quarter to take account both of more recent information and improved seasonal factors

(2) All series are seasonally adjusted except CB, CD and CK.

(3) Where the sections are highlighted in bold; the weights sum to the Index of Production (IoP = 1,000). Those sub-sections whose weights are not highlighted sum to the individual section e.g the sum of the weights for sub-sections CC, CG and CM sum to Section CCGM. There may be some apparent slight discrepancies between the constituent items and the total due to rounding.

(4) UK figures for production as published by the Office for National Statistics on 31 March 2017 and UK figures for Construction as published by the Office for National Statistics on 10 March 2017.

(5) Relates to SIC 2007 Sections D - Electricity, Gas and Air Conditioning Supply and Section E - Water Supply; Sewerage, Waste Management and Remediation Activities.

(r) Data revised since last publication
