Council Tax Collection Rates in Wales: 2018-19

Key points

- In 2018-19, billing authorities collected 97.3% of council tax billed, a decrease of 0.1 of a percentage point.
- 6 authorities recorded a year-on-year increase in their collection rate in 2018-19 and 16 recorded a decrease.
- Flintshire recorded the highest in-year collection rate at 98.2% whilst Blaenau Gwent recorded the lowest at 93.7%.
- The amount actually collected in respect of 2018-19 bills, excluding council tax reduction scheme, was £1,546 million out of £1,589 million collectable.
- During 2018-19, billing authorities collected £27 million of arrears and wrote off £6 million as uncollectable.
- The total amount outstanding at 31 March 2019 was £94 million, of which £42 million was in-year arrears.

Chart 1: Council tax collection rates: percentage point difference from the Wales average, 2018-19

About this release

Council tax is the main source of locally raised income for local authorities. It is the source of funding used to meet the shortfall between the amount an authority wishes to spend and the amount it receives from other sources. This statistical release analyses the amount of council tax that Welsh local authorities collected in the 2018-19 financial year.

Minimum: 93.8, Maximum: 98.3

(a) The net collectable debit is the council tax for the relevant year that authorities would collect if everyone liable had paid. The collection of any arrears of council tax are excluded. The figures are net of council tax reduction scheme.

(b) The ‘assumed collection rate’ includes the collection of amounts after the year-end.

### Chart 2: Arrears of council tax brought forward at 31 March

(a) For 2019, the amount outstanding is used.
Table 2 shows a comparison of the amounts outstanding by authority. Overall, total arrears increased by £6.1 million or 7%.

</table>

(a) The amounts are net of all deductions on council tax bills, such as council tax reduction scheme.
(b) Includes bills raised (positive) and reductions for overbilling (negative) for previous years.
(c) Differences compared to the previous year are due to incorrectly stated arrears carried forward.
Chart 3 shows that Merthyr Tydfil has the highest amount outstanding per chargeable dwelling at £167 whereas Flintshire has the lowest at £41. The Wales average is £68.

Chart 4: Amounts written off during year

- Arrears of community charge
- Previous years council tax
- In-year council tax

Chart 4 shows the amount of council tax written off during the year. Billing authorities wrote off £6.4 million of council tax arrears in 2018-19.
Glossary

Data sources
The main source of information about council tax collection are the Council Tax Collection (CTC) returns from billing authorities.

Background
County and county borough councils are known as billing authorities, i.e. they collect council tax on behalf of the other charging authorities, namely police authorities and local community councils.

The CTC returns cover information about actual council tax raised and received, together with information about the arrears of council tax and the former community charge. The figures are net of all deductions on bills, including those covered by the council tax reduction scheme. Data are currently available, for the current structure of Welsh local authorities, from 1996-97 onwards.

The assumed collection rate is the billing authority’s estimate of the percentage of council tax for the year that will be ultimately paid. In arriving at a percentage collection rate, authorities take into account the likely sum to be collected, previous collection experience and any other relevant factors. They make an estimated allowance for sums from the council tax reduction scheme and write-offs/non-collection.

The main point to note in respect of council tax collection information is that billing authorities sometimes face difficulties in separating receipts of arrears of council tax from payments in respect of the current year. In these cases, the figures may have been estimated by billing authorities.

Key quality information
Official Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political reference.

This section provides a summary of information on this output against six dimensions of quality: Relevance, Accuracy, Timeliness and Punctuality, Accessibility and Clarity, Coherence, and Comparability.

Relevance
The statistics are important and have a number of uses, for example: advice to Ministers; local government finance revenue settlement calculations; unitary authority comparisons and benchmarking; expenditure in Wales compared to other countries; informing the debate in the National Assembly for Wales and beyond; assisting in research in public expenditure issues; economic analysis.

Accuracy
The main source of information on local authority council tax collection is the Council Tax Collection (CTC) return. The latest returns relate to the 2018-19 financial year.

We collect 100% of returns from all twenty-two county councils. The collection is a 100% survey and as such no estimation of the figures is calculated, and hence there is no sampling error.
In tables where figures have been rounded to the nearest final digit there may be an apparent discrepancy between the sum of the constituent items and the total as shown.

Once we receive the data, it goes through further validation and verification checks, for example:

- spend per head by local authority;
- arithmetic consistency checks;
- cross checks with other relevant data collections;
- thorough tolerance checks;
- outturn comparison with budgets;
- cross checks with data from other government departments;
- verification that data outside of tolerances are correct.

The data that is collected adhere to recognised professional standards. Specifically, the finance data is required under legislation and also must adhere to CIPFA accounting procedures. However, further guidelines are also available on the interpretation of these standards to ensure consistency.

**Timeliness and punctuality**

The data collection is carried out in April and May. The data is published in June, this allows time to collect, collate and validate the data.

All outputs adhere to the Code of Practice by pre-announcing the data of publication through the [upcoming calendar](#) web pages.

**Accessibility and clarity**

The Welsh local government finance statistics are published in an accessible, orderly, pre-announced manner on the Welsh Government website at 9:30am on the day of publication. All releases are available to download for free.

More detailed data are also available at the same time on the [StatsWales website](#) and this can be manipulated online or downloaded into spreadsheets for use offline.

We aim to use Plain English in our outputs and all outputs adhere to the Welsh Government accessibility policy. Furthermore, all our headlines are published in Welsh and English.

We regularly peer review our outputs.

**Comparability and coherence**

Adhering to the professional code (CIPFA’s SeRCOP) has meant that changes over time have been minimal. Where there have been time series which are not comparable from the start of the time series to the end this will be shown clearly in the outputs. Where advance warning is known of future changes these will be pre-announced in accordance with Welsh Government arrangements.

The existence of a professional code and our adherence to it provides assurance that the data are consistent across domains, such as local authorities.

Data on council tax are also available for [England](#) and [Scotland](#). The council tax system does not apply to Northern Ireland.
National Statistics status

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Statistics.

National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value.

All official statistics should comply with all aspects of the Code of Practice for Statistics. They are awarded National Statistics status following an assessment by the UK Statistics Authority’s regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate.

It is Welsh Government’s responsibility to maintain compliance with the standards expected of National Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.

Well-being of Future Generations Act (WFG)

The Well-being of Future Generations Act 2015 is about improving the social, economic, environmental and cultural well-being of Wales. The Act puts in place seven well-being goals for Wales. These are for a more equal, prosperous, resilient, healthier and globally responsible Wales, with cohesive communities and a vibrant culture and thriving Welsh language. Under section (10)(1) of the Act, the Welsh Ministers must (a) publish indicators (“national indicators”) that must be applied for the purpose of measuring progress towards the achievement of the Well-being goals, and (b) lay a copy of the national indicators before the National Assembly. The 46 national indicators were laid in March 2016.

Information on the indicators, along with narratives for each of the well-being goals and associated technical information is available in the Well-being of Wales report.

The statistics included in this release could also provide supporting narrative to the national indicators and be used by public services boards in relation to their local well-being assessments and local well-being plans.
